Test1 : Elapsed time with different number of worker threads

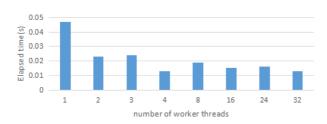

Test2: Elapsed time with different number of worker threads

Test3: Elapsed time with different number of worker threads

Test4: Elapsed time with different number of worker threads

1. 怎麼分割

   答：用第一個 matrix 的 row 分割
2. 一個 thread 一個 core 最好
3. 超過就要很多 thread 搶一個 core，效能變差
4. Core 多於 thread 效能不會明顯下降
5. 心得：test4 時間最少，可見時間和測資有關
